

# ACCESS CONTROL SOFTWARE THAT FUNCTIONS ON A HIGHER LEVEL

## Endless Possibilities For Your Business and Your Clients

Aurora is the culmination of Keyscan's 25-year commitment to innovation in access control.

With a completely redesigned user interface, Aurora leverages the expanded processing power and capabilities of Keyscan's most recent line of access control units to create a new world of possibilities.

- Expandable support for up to 90,000 credentials
- 10 assigned groups to a single individual
- Multiple credentials assignable to a single individual
- Unlimited optional user-definable fields
- Panel-to-panel global communication
- An all new communication structure

Aurora supports small and mid-size access control installations while also exceeding the demands of truly large access control deployments.
