

Farpointe 125 kHz Credentials

Compatible, cost-effective
low frequency credentials

A compatible, reliable and less expensive
alternative for proximity access control

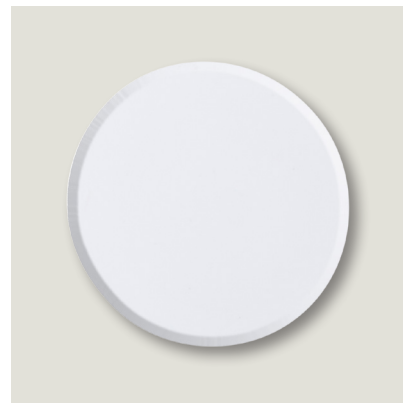

PSM-2P-H Multi-tech prox card

For those who utilize photobadging this ISO graphics quality card is ideal. Ready for use with any dye-sublimation card printer. This card credential functions with Keyscan K-PROX3, K-PROX2, K-KPR, K-VAN; Farpointe P-620-H, P-710-H and P-900-H and any 125kHz readers using a Wiegand protocol. It is a suitable and less expensive alternative to traditional prox credentials. Available in Keyscan 36bit format.

PSK-3-H Proximity fob

For those who prefer a fob on a key ring as opposed to a card or tag credential, look to this Farpointe PSK-3 fob. It functions with Keyscan K-PROX3, K-PROX2, K-KPR, K-VAN; Farpointe P-620-H P-710-H and P-900-H as well as HID readers using a Wiegand protocol. And, they can be ordered to support Keyscan 36-bit format.

PDT-1-H Prox Disc prox tag

This prox tag is convenient to use. Most users adhere it to an ID badge or the case of their mobile phone to convert it to their access control credential. It functions with Keyscan K-PROX3, K-PROX2, K-KPR, K-VAN; Farpointe P-620-H, P-710-H and P-900-H as well as HID readers using a Wiegand protocol. And, they can be ordered to support Keyscan 36bit format.

Wireless Transmitters

Keyscan, Farpointe and HID compatible readers will also function with these RF transmitters and a K-RX wireless receiver:

Keyscan K-TX2: 4-button with 36 bit HID prox coil for readers

Keyscan K-INTX2: 4-button with 36 bit Keyscan Indala prox coil for readers

NOTE: All transmitters use Keyscan 36 bit RF for use with K-RX wireless receivers.
