

# PowerPlex 2000

BEYOND SECURITY

## Cost-effective access control for stand-alone applications

- Self-Powered, no external power required
- Stand-alone, no wires to run
- No batteries required
- Supports 100 PIN access codes
- Easy to install, new and retrofit projects
- Provides audit trail

PowerPlex is a self-powered, electronic PIN push button lock that uses patented super-capacitor technology in place of batteries or external power sources to power the door lock, making it a cost-effective access control solution for standalone applications.

# PowerPlex 2000

BEYOND SECURITY

## Features

- **Self-Powered:** No need for batteries or other power sources as lock generates its own power with every turn of the lever.
- **Standalone:** No wires to run to or through the door
- **No Batteries:** The perfect eco-friendly solution for customers adopting environmental sustainability initiatives.
- **Lock holds a full charge** for up to 70 days with no activity at the door
- **PIN access** supports 100 unique user codes
- **Packaged pre-assembled** so PowerPlex is easily installed on any standard interior or exterior door
- **Provides an Audit Trail**

## Applications

PowerPlex is the ideal access control solution for small sites with only 1 or 2 critical doors to be secured; for remote sites that cannot be easily networked to an existing access control system; or as an introductory access control product.

Some possible applications include:

- Small-to-medium size facilities
- Rarely visited remote locations
- Retail "Employees Only" Areas
- Warehouses / Stock Rooms
- IT Rooms
- Cash Rooms / Storage / Break Rooms
- Medication Cabinets
- Restricted Areas
- Conference Rooms
- Managers Offices
- R&D Labs
- High Voltage / Cell Towers / Substations
