

# Webinar Training

## dormakaba Access Control Education Series

### **Webinar Topic:**

Keyscan Aurora VMS Integration

### **Course Description**

Keyscan Aurora users can access and control their Video Management System (VMS) within either the new Keyscan Aurora software interface or the VMS clients Interface. It nicely couples access control and video management into one convenient platform. Together, Keyscan's single-platform interface with VMS software, supports virtually all security and access control deployments. With this new integration module, you can nicely consolidate and control all of your video feeds without the need for multiple software platforms running. And, you can leverage the VMS within the Aurora interface to take advantage of multiple features built into Keyscan Aurora access control management software.

### **Content:**

This 20-minute training course covers both Aurora's functionality and requirements to configure the software within a Keyscan Access Control System. Some of the training highlights include:

- Adding and configuring a NVR
- Viewing Live Cameras from Aurora
- Video Event Setup
- Recalling Events

A brief question-and-answer period will be held at the end of the seminar.

### **Who Should Attend**

This course is designed for sales personnel and service technicians who are familiar with Keyscan Access Control Systems.
